☎ +595 981 282 485 alarreine@gmail.com
📍 497 Cnel. Gracia, Asunción, Paraguay
📅 DOB 21/12/1985 (33 year old) Asunción, Paraguay

Developer with 5 years of experience in JEE and Java-Android. I have also an experience in Databases like Postgresql and Oracle. I'm working today as a DevOps Engineer, learning new skills in the DevOps Culture and its tools. I am interested in new technologies and the opportunities that can bring web-mobile development, I wish to continue my career innovating on development projects as a software architect and/or developer/architect.

COMPUTER SKILLS

Programming Languages	Java (JEE, JSE, JME), C, PHP, Python
Programming web	Javascript, AngularJS, Bootstrap, CSS
Programming mobile	Ionic, Java-Android, J2ME
Data Base	Oracle Database, Microsoft SQL Server, MySQL, PostgreSQL
Tools	IntelliJ Idea, Eclipse, Visual Studio, Maven, Ant, SVN, git, Jira
Middleware	Wildfly, Glassfish, WebLogic
OS	Mac OS, Windows, Redhat, Centos
Modelling	UML, OCL
CRM	Salesforce Admin
Other	Bonitasoft

WORK EXPERIENCE

August-2019 | Sr Software Developer, TELECEL SA, Asuncion-Paraguay

Current

Provide process automation with a BPM engine.

- > Analyzing current process
- > Proposing solutions according the environment and controls
- > Development

Jira Git Java Bonita Groovy

September-2017 | Devops Engineer, BONITASOFT, Grenoble-France

March-2019

Provide a solution to use Continuous Delivery practices for Bonita Stack.

1 year internship

- > Create and modify Ansible scripts
- > Design and development in python
- > Automation of deployment in AWS
- > Participation in the implementation of Jenkins and Nexus
- > Salesforce admin

Ansible Amazon AWS Jenkins Maven Nexus Python git Salesforce Jira

FEBRUARY-2017 | INTERNSHIP | RESEARCH, LIG, GRENOBLE-FRANCE

JUNE-2017

Working in a research team with an exploratory project about The Automation Porting of Device Drivers
<https://persyval-lab.org/en/exploratory-project/automated-porting-device-drivers-apd2>

TASK

- > Creating scripts in Coccinelle to search in Linux Code
- > Creating scripts in Termite
- > Analyzing linux code and result from Coccinelle and Termite

Coccinelle Haskell C ocaml L^AT_EX

JUNE-2014	ANALYST-DEVELOPER JEE - ANDROID, LOTHAR SA - TIGO, ASUNCIÓN-PARAGUAY
MARCH-2016	Working in a developer team on different projects, all with different stacks and depending on other architectures like SMSSender, USSD, middleware and others
	TASK <ul style="list-style-type: none"> > Supporting and Maintaining JEE applications > Analyzing and developing new features > Redaction of the documentation > Supporting, maintaining and adding new features in android application <small>Google Play id=com.tigo.cs.android</small> > Analyzing and developing a new multi-stack application. <small>Google Play id=com.tigo.star.android</small>
