25 Rue de la Poste, 38000 Grenoble
DOB 12/21/1985 (32 year old) Asunción, Paraguay

Developer with 3 years of experience in JEE and Java-Android. I have also an experience in Databases like Postgresql and Oracle. I'm working today as a DevOps Engineer (internship), learning new skills in the DevOps Culture and its tools. I am interested in new technologies and the opportunities that can bring web-mobile development, I wish to continue my career innovating on development projects as a software architect and/or developer/architect.

Computer Skills

Programming Languages :	**Java** (**JEE**, **JSE**, JME), C, PHP, Python
Programming web :	Javascript, AngularJS, Bootstrap, CSS
Programming mobile :	Ionic, Java-Android, J2ME

Work Experience

September-2018
Currently

Devops Engineer, Bonitasoft, Grenoble-France
Provide a solution to use Continuous Delivery practices for Bonita Stack. Salesforce admin and developer.
> Create and modify Ansible scripts
> Design and development in python
> Automation of deployment in AWS
> Participation in the implementation of Jenkins and Nexus

`Ansible` `Amazon AWS` `Jenkins` `Maven` `Nexus` `Python` `git` `Salesforce`

September-2017
August-2018

Internship | Devops Engineer, Bonitasoft, Grenoble-France
Provide a solution to use Continuous Delivery practices for Bonita Stack.
> Create and modify Ansible scripts
> Design and development in python
> Automation of deployment in AWS
> Participation in the implementation of Jenkins and Nexus

`Ansible` `Amazon AWS` `Jenkins` `Maven` `Nexus` `Python` `git`

February-2017
June-2017

Internship | Research, LIG, Grenoble-France
Working in a research team with an exploratory project about The Automation Porting of Device Drivers
https://persyval-lab.org/en/exploratory-project/automated-porting-device-drivers-apd2
Tâches
> Creating scripts in Coccinelle to search in Linux Code
> Creating scripts in Termite
> Analyzing linux code and result from Coccinelle and Termite

`Coccinelle` `Haskell` `C` `ocaml` `LaTeX`

June-2014
March-2016

Analyst-Developer JEE - Android, Lothar SA - Tigo, Asunción-Paraguay
Working in a developer team on different projects, all with different stacks and depending on other architectures like SMSSender, USSD, middleware and others
Tâches
> Supporting and Maintaining JEE applications
> Analyzing and developing new features
> Redaction of the documentation
> Supporting, maintaining and adding new features in android application Google Play **id=com.tigo.cs.android**
> Analyzing and developing a new multi-stack application. Google Play **id=com.tigo.star.android**

`Oracle 12c` `RedHat` `svn` `maven` `J2EE` `JMeter` `Glassfish` `Rest`

February-2012 May-2014	**Data Base Administrator, Contrataciones Públicas, Asunción-Paraguay**

Data Base Administrator, Contrataciones Públicas, Asunción-Paraguay
In charge of the Dev and Preproduction Database
Tâches
> Installation and configuration of the development and preproduction environment
> Checking log status
> Query, function and procedure optimization
> Backups
> Design and Implementation of a Replication System and restore procedure
> Design and development of a database multi index for searching related data in the database

`PostgreSQL` `MySQL` `REDHAT 7` `PgBench` `Zennos` `Bash` `HeartBeat` `PgPool`

September-2011 December-2012

Developer Freelance, The Derby, Asunción-Paraguay
> Supporting and Maintaining J2ME application.

`Java J2ME` `Android` `PHP` `Delphi RAD Studio`

September 2011 January-2012

Developer, Computer and System Department, Justice Palace, Asunción-Paraguay
> Conception and Development of a Criminal Record searching.

`.NET` `SQL Server`

Education

Currently	**University of Grenoble Alps - IM2AG** Master 2 Software Engineering
2016-2017	**University of Grenoble Alps - IM2AG** Master 1 Computer Science
2011	**University Autónoma de Asunción** Systems Audit Specialization
2005-2010	**University Autónoma de Asunción** Bachelor degree in Computer Science
